

It has come to my attention that my ability to listen to K-LOVE could be compromised by Low Power FM stations. The signal in my area is already weak, and this would probably wipe out a significant amount of the signal I now receive. I know what a powerful ministry K-LOVE is, as it is my 5 year-olds favorite station! I can leave K-LOVE on and not worry about what new words or phrases she will learn or ask about. I cannot say the same about other stations. Please consider the negative impact this ruling could have, and please preserve the priority current translators receive.
